### Assignments

*See the specific assignment in eLearning for all assignment requirements and rubrics outlining grading criteria.*

1. **Mini-Assignments** (20 points each/100 points) Students will participate in Mini-Assignments posted within the module to accrue 100 points. Examples of Mini-Assignments may include items such as the Syllabus Quiz or an exercise such as an Annotated Bibliography. Guidelines and due dates for Mini-Assignments can be found in the modules in Canvas.
2. **Discussion Board** (20 points each/160 total points): Students will substantively participate in eight online discussions (one week in duration each) using the Discussion Board on the course website. A topic or discussion question, often relating directly to required reading, observation or creative process, will be posted by a student serving as Discussion Facilitator, and all students will post an initial response in essay form and also respond substantively to a **minimum of 2** other posts. By the end of the week, the discussion facilitator will submit one succinct post articulating a collective viewpoint, or lack thereof with reasoning, in response to the prompt.

3. **Creative Practice** (10 points each/40 points total): Students will participate in four creative practices following creative practice prompts and post about: a) self-reflection on the practice; b) adapting the practice for health populations. Students will be graded on evidence of: a) current, creative practice, b) effort, c) reflective and critical thinking regarding the personal experience of the creative practice; and d) ways to adapt the creative practice.
4. **Health Issues** (25 points each/50 points total): Students will select a health topic and thoughtfully create a substantial post outlining the health issue; and specifying how the arts are, or can be, engaged to address the issues. Contributions will include personal perspectives, links to relevant and credible news or other media, and references to peer-reviewed journal articles and literature.
5. **What is Art for? Research Paper and Presentation** (100 points): Students will research the roles of the arts in contemporary healthcare and community health practices. Select one artistic discipline and its application in health (i.e. Dance for PD) to research and present. Students will present their findings in a 1,200 to 1,500-word research paper in response to the reading, and critical reflection on historical and contemporary practices in comparison or contrast with Dissanayake's text, *What is Art For?* The research paper will be accompanied by a presentation which may be in any approved multimedia format, including development of a website, video, or other presentation medium to be shared online with the class. Break down and digest your research in an accessible and engaging manner. Make sure to cite your resources at the end of the presentation.
6. **Case Study and Creative Practice Self-Study Presentation** (125 points): The case study and presentation will include a literature review, observation of one's own creative process in comparison or in contrast with the observations made of a practicing artist, and submission of a written case study. The case study will accompanied by a multimedia presentation which may include: a) an overview of the creative practice undertaken during the semester; b) the results of analysis of written reflections, and c) articulation of a creative process clearly viewed through the lens of 1-2 selected theoretical frameworks. As in the first major assignment, presentations may utilize development of a website, video, PowerPoint, or another approved multimedia format.
