PREREQUISITE KNOWLEDGE AND SKILLS: Approval by the graduate programs advisor and instructor. Draft of Independent Study proposal to the instructor.

COURSE DESCRIPTION: This is a variable-credit course and credit hours are determined by the length and intensity of the independent study design and requirements. This course will engage the student in independent study in arts in medicine in a healthcare or community environment. The student will propose independent study activities for approval by the instructor within one week of the course start. Literature review, regular meetings with the course instructor, and a culminating academic presentation or paper will deepen the student's understanding of a specialized topics related to research and/or practice in arts in medicine.

The independent study in Arts in Medicine provides graduate students with the opportunity to research or examine a topic in depth in addition to the student's program of study. A student who requests to, or is advised to, undertake an independent study must present a brief proposal to the appropriate faculty member prior to engaging in the independent study. This proposal should describe what the student plans to do, what resources will be used, and what work will be produced as a result, such as an original presentation, paper or project based upon extended study of a topic that addresses an identified issue or need with the field of art in medicine.

COURSE OBJECTIVES

Although the objectives and outcomes of each independent study will vary, course objectives typically involve achieving one or more of the following goals.

1. Expand knowledge or demonstrate understanding on a specific topic of interest in depth
2. Develop or enhance skills in analyzing, synthesizing, and integrating arts in health-related information or experiences
3. Develop or enhance skills in project identification, development, management, and/or implementation
4. Develop or enhance academic skills in presenting relevant material in oral and/or written formats
5. Develop or enhance research skills

COURSE ASSIGNMENTS

A complete Independent Study proposal will include the following:

1. **Study Title:** Identify a clear title for the independent study.
2. **Number of credit hours:** Propose # of credit hours and # of hours to be invested accordingly

3. **Study Description (including study topic, question, goals and objectives):** State the study question, goals and objectives for the independent study. Develop objectives for your study that relate to learning objectives and correspond realistically with the number of credit hours
4. **Study Materials:** Describe readings and materials as necessary to the study
5. **Outline + Timeline of Activities:** Describe activities and assignments that will meet the learning objectives and provide the proposed timeline of activities. Please include monthly scheduled meetings with the instructor in the timeline, and contact that instructor for additional meetings as needed.
6. **Study Outcomes:** State the anticipated deliverables and how these will be disseminated.
7. **Method of Evaluation:** Propose how the independent study will be evaluated and what method of evaluation or criteria will indicate success of the study.
