Description:

This course explores the links between creativity and health, focusing on the many ways that visual arts practices can be used to support health and wellness in healthcare and community settings. It includes studio workshops, lecture/discussion, video viewing, readings/literature research, group project work, and hands-on experiences and instruction on facilitating art experiences with a wide variety of materials and processes. The course will differentiate studio practice in arts in health and art therapy. This course is appropriate for students of the arts and/or of health related fields who are interested in and comfortable with movement. Instructor approval is required for registration.

Objectives:

1. Students will become acquainted with the ways in which the visual arts have been used historically to enhance health and healing as a context for the contemporary theory and practice of arts in healthcare. *Students will have access to this information through class lecture and discussion, group research, and consulting listed resources.*

2. Students will identify the basic knowledge and skills necessary to function as an artist in a healthcare or community setting, including gaining/strengthening/maintaining personal creative process; discovering ways to engage participants in their own creative processes; and use this knowledge and skills to facilitate art-making experiences with others. *Students will develop, facilitate, share, and engage in art activities during class time, contribute to a class-created art activity database, and develop a personal art portfolio.*

3. Students will become familiar with visual arts programs and practices designed to enhance health through direct observation and research. *Students will view films, read assigned literature, and will participate in class sessions and on-site observations.*

4. Students will develop critical research and thinking skills. *Students will evaluate literature in the field to develop a literature review and reflect and review feedback on student-facilitated art experiences in class.*

5. Students will illustrate effective communication in verbal and written form. *Students will participate in in-class discussions on readings, provide peer feedback on student-facilitated art experiences, provide verbal and written evaluations of case studies in the field, and develop an art database with clear steps for specific processes.*

Assignments and Evaluation:

Total Points: 100

Practice Presentation and Literature Review – 20 points (20% of grade)

Visual Arts Facilitation – 30 points (30% of grade)

Art Activity Database - 10 points (10% of grade)

Covid-19 Arts Response Presentation - 10 points (10% of grade)

Portfolio/Art Exhibition – 10 points (10% of grade)

Participation (peer feedback, discussion, attendance) - 20 points (20% of grade)

Major Assignments:

Participation (20 points):

Participation will be assessed each class period. Students are expected to be on time, prepared, and engaged in class art activities and discussions.

Practice Presentation and Literature Review (20 points):

You will research a contemporary practice or program of your choice related to visual arts and health after becoming familiar with existing literature and programs in the field. Students are encouraged to investigate programs that speak to their personal creative practices and/or populations of interest.

Visual Arts Facilitation (Group Project) (30 pts):

With a partner, you will develop an art experience suitable for a group workshop and lead the class through it. The experience should demonstrate your skills as facilitators and include some kind of formative and summative self-assessment from participants. You will have one hour to facilitate your exercise, walking the class through set-up and clean-up procedures as well as introducing and leading the activity - time and media management should be demonstrated. Students are encouraged to develop an activity accessible to all skill levels that can be adapted for different environments and populations.

Covid-19 Arts Response Presentation (10 points):

Each student will present one or two practices found in the Covid-19 Arts Response Repository to the class. Each presentation will be 10-15 minutes and can either be in PowerPoint form or a screen-shared walkthrough of the resource if it contains videos or is particularly image-heavy.

Art Activity Database (10 points):

You will gather ideas for 5 visual arts activities appropriate for a group setting and

organize them into an “art menu” that outlines the following for each exercise: a) Brief description of the exercise; b) Space, resource, and material requirements; c) A wide range of sample images using the materials/processes introduced. At the end of the course, the class will combine these menus to create a database available to the whole course.

Digital Portfolio (10 points):

At the end of the semester, students will collect and title the work they have created (through the Visual Arts Facilitation presentations and in-class assignments) into a digital portfolio. Students will develop artist’s statements as well as skills in art curation through this process.

Course and University Policies and Resources:

Attendance: *Attendance is mandatory.* This is a highly experiential course, and the only way you can acquire the information and gain the practical experience is to be present at the class or on-site session.
