**SEMINAR FOCUS**

This seminar focuses on representations of indigenous people in music, particularly by Latin American composers in the twentieth century. Such representations posit several epistemological, ontological, and political problems, which tend to determine both local and global views on indigeneity. The music of Heitor Villa-Lobos (Brazil), Carlos Chávez and Silvestre Revueltas (Mexico), and contemporary American composers such as Chris Dersken and Mali Obomsawin will provide the “texts” for the seminar to confront issues of representation, self-representation, and the role of audiences (musicologists included) in the dissemination of mostly constructed images, as well as self-determination and sovereignty. As we formulate our methodologies, based on music analysis, archival research, and postcolonial and identity theories, the goal is for participants to be able to transpose the knowledge acquired and produce an original paper related to their area of interest.

Desired Outcome: Students will acquire fluency on relating music analyses and archival research to post-colonial theories and methodologies for analyzing and interpreting representations of indigeneity in music.

Seminar Goal: Students will produce an original research paper based on the theories and methodologies presented in the seminar. This research may lead to conference presentations and article publication.
